

**THE REPUBLIC OF UGANDA
MINISTRY OF HEALTH**

HEALTH GUIDELINES DURING THE CHAN GAMES IN AUGUST 2025

**DR CHARLES OLARO
DIRECTOR GENERAL HEALTH SERVICES**

JULY 14TH, 2025

INTRODUCTION

Uganda is honored to host the 2025 African Nations Championship (CHAN) in August, a key milestone in preparation for the 2027 Africa Cup of Nations (AFCON). The Ministry of Health is leading the Health Sub-Committee to ensure the well-being of all participants. Below are essential health guidelines for officials, players, and visitors during the tournament.

1. Accommodation Facilities:

Guests are strongly advised to use only the accredited hotels. These have been assessed and approved to meet good hygiene, sanitation, and environmental health and safety requirements.

2. Emergency Medical Care:

The Government of the Republic of Uganda will provide Emergency Medical Services to all participants as and when required. These will include standby Emergency Medical Teams, Ambulance services, and hospitalization in accredited hospitals. In accredited hotels, a standby medical clinic will be set up and delegates will be provided with the contact telephone numbers of the Emergency Medical Doctor. There will be a standby ambulance team for each participating country team and CAF officials.

3. Travel Health / Medical insurance:

All participants are strongly encouraged to obtain travel medical insurance before arrival.

For more guidance, contact your embassy in Uganda, football association, or the AFCON Secretariat.

4. Pre-existing Medical Conditions:

Guests with chronic illnesses should carry enough medication for the duration of their stay. However, there are a number of established Pharmacies in the country where one can buy or replenish their medicine supplies with a prescription.

Original prescriptions are required for medications valued above USD 500. Digital backups of medical details are recommended.

5. Malaria

Uganda has low malaria risk in Kampala (1%) and moderate risk (below 9%) in central/western regions. However:

- Non-immune visitors (from non-malaria zones) should:
 - Consult a doctor for malaria prophylaxis before travel.
 - Use mosquito repellents and long-sleeved clothing at night.
- Visitors from malaria-endemic regions do not need prophylaxis but can access treatment if needed.
- Hotels will provide insecticide-treated nets and/or room spraying.

Attached is the technical Note on Malaria in Uganda.

6. Yellow Fever Vaccination

All delegates must present a valid Yellow Fever Vaccination Certificate upon entry.

- Vaccination must be administered at least 10 days before travel.
- The certificate is valid for life.

Those delegates with approved exemptions, should present evidence.

7. Safety on the Road

While public transport by motorbikes, commonly known as Boda-boda, is the quickest means of transport around some congested parts of Kampala city, participants are advised to be careful while using '*Boda-boda*' transport because of risk to accidents. Where possible, guests are advised to use safer modes of transport.

8. Drinking water

Efforts have been made to purify tap water in the city. However, all delegates are advised to drink only boiled/ bottled water.

9. Aeromedical Services

The Government of Uganda (MOH, UPDAF & UPF) shall provide air ambulance services to delegates within the country when required. For conditions requiring evacuation to other countries, CAF secretariat has provided standby cross country aeromedical services to cover the EAC Pamoja CHAN Tournament.
